

# CompUSA superstores to retail *LinkFixerPlus* software nationwide.

DALLAS, TEXAS, (JUNE 14, 2004) — CompUSA<sup>®</sup> Inc., one of the nation's leading retailers and resellers of computer products and services, today began offering LinkTek Corporation's *LinkFixerPlus* software. *LinkFixerPlus* is a data migration tool that lets users move Excel, Word, PowerPoint and other files to different servers or folders without creating broken links. Patent pending *LinkFixerPlus* also provides link reporting, maintenance and repair tools and is the first software application that can fix broken links *automatically* when files or folders are moved or renamed.

*LinkFixerPlus* will initially be available in 25 of CompUSA's top locations in the Dallas, Seattle, San Francisco and New York market regions via the new Software-To-Go<sup>®</sup> electronic delivery system. Moreover, *LinkFixerPlus* will soon be available to customers in *all* CompUSA stores nationwide as the Software-To-Go system is installed in each of the company's stores before the end of the year.

Software-To-Go is an electronic software delivery system designed for the retail sales floor. This system enables retailers, such as CompUSA, to expand their software product offerings without increasing shelf space. On-demand kiosks with touch-screens allow customers to interactively search for and purchase software titles, including LinkTek's *LinkFixerPlus* software. CompUSA employees then instantly create a finished product for the software including a CD-ROM complete with full-color packaging.

“We are proud to have been selected to be one of the first software products to be made available in the CompUSA stores via the new Software-To-Go system”, said Bruce Saliga, Executive Product Manager at LinkTek Corporation. “This new on-demand technology will greatly help to deliver complete boxed packages of *LinkFixerPlus* into customers' hands.”

Using patent-pending technology, *LinkFixerPlus* helps eliminate the time-consuming and tedious process of manually finding and fixing broken links in many popular file formats including Microsoft Word, Excel, PowerPoint and HTML files. Additionally, *LinkFixerPlus* can create a variety of detailed reports showing all of the links contained within a user's files, including broken links.

First introduced at the 2002 *Internet World* convention in New York City, *LinkFixerPlus* won the *Best of Show* award in the design category. Since that time, *LinkFixerPlus* has been favorably mentioned on: Computer America talk radio, CNET radio, CNNfn, PC Magazine, Entrepreneur Magazine, the Washington Post, the New York Times and the Wall Street Journal.

## **How to Contact LinkTek**

For more information about *LinkFixerPlus*, please visit LinkTek's Web site at <http://www.linktek.com>, call +1-727-442-1822 extension 9029 or e-mail [9029@linktek.com](mailto:9029@linktek.com).

## **About LinkTek**

Headquartered in Clearwater, Florida, LinkTek Corporation provides software solutions for automating the management and repair of links contained within a wide variety of prevalent file formats. LinkTek's flagship product *LinkFixerPlus* breaks new ground and introduces the new software category of "automatic link repair". *LinkFixerPlus* is the first application designed to automatically fix broken links when files are moved or renamed.
