

# Shell Trading adopts *LinkFixerPlus* to help ensure data integrity.

CLEARWATER, FLORIDA, USA — Shell Trading of Houston Texas adopts LinkTek's *LinkFixerPlus* software (<http://www.LinkTek.com>) to help ensure data integrity and to provide risk mitigation for the data migration process. *LinkFixerPlus* is a leading data migration tool that can automatically repair broken links when files or folders are moved or renamed.

“We purchased *LinkFixerPlus* to help ensure data integrity while moving data between servers for load-balancing purposes. The data on our servers is crucial for business operations and a risk of breaking links would threaten disruption that we could not afford. Such risk would have called a halt to the project, due to financial and legal consequences. *LinkFixerPlus* has proven to be a good product and very helpful. It provides risk mitigation for the data migration process,” stated Alex Rebsch, Corporate IT, Shell Trading.

Bruce Saliga, LinkTek's President, related “Shell Trading needed to ensure the integrity of links between their organization's files while moving data between servers. This is a common problem for IT departments. As the data being moved is often crucial for business operations, broken links could cause costly disruption to business processes. Because of the financial and legal risks involved with disrupted operations, many companies are faced with the daunting task of trying to fix tens of thousands or even millions of broken links.”

*LinkFixerPlus* is the first software application that can be used to safeguard links in files so that when broken links subsequently occur, *LinkFixerPlus* can be used to *automatically* fix the broken links caused by files or folders that were moved or renamed without using *LinkFixerPlus* (for example when using Windows Explorer). Using patented technology, *LinkFixerPlus* helps eliminate the time-consuming and tedious process of manually finding and fixing broken links in many types of files.

Companies such as AGFA, Boeing, Cargill, John Deere, Paramount Pictures and Raytheon Systems Company have found that migrations are faster, more efficient and have less user interruption when using *LinkFixerPlus*.

LinkTek Corporation is the world's leading provider of software that automates the management and repair of links contained within a wide variety of popular file formats including Excel, Word, PowerPoint, Access, AutoCAD, MicroStation, PDF, InDesign, PageMaker, HTML and others.

### **How To Contact LinkTek**

For more information about LinkTek's *LinkFixerPlus*, <http://www.LinkTek.com>, call 727-442-1822 extension 9413, or e-mail [info@LinkTek.com](mailto:info@LinkTek.com).

### **About LinkTek**

Headquartered in Clearwater, Florida, LinkTek Corporation provides software solutions for automating the management and repair of links contained within a wide variety of prevalent file formats. LinkTek's flagship product *LinkFixerPlus* breaks new ground and introduces the new software category of "automatic link repair". It is a leading data migration and link repair tool used by some of the world's largest corporations. *LinkFixerPlus* is the first application designed to automatically fix broken links when files are moved or renamed.
