# Newest version of *LinkFixerPlus* supports Adobe InDesign CS3 files.

CLEARWATER, FLORIDA, USA — LinkTek Corporation, the pioneer in software solutions that automate the management and repair of links contained within a wide variety of common file formats, announced today the release of a new version of their *LinkFixerPlus* link maintenance and repair program, created specifically for users of Adobe's popular InDesign page layout software.

This new version of *LinkFixerPlus for Adobe InDesign* ensures that links contained within Adobe InDesign Creative Suite 3 (CS3) files that point to external files, (such as charts, images, fonts and other linked files), are automatically fixed when InDesign files are renamed or moved — for example, when files are renamed due to a project name change, or when files are moved to a new folder, disk drive or server.

*LinkFixerPlus* is the first software application that can fix broken links automatically in Word, Excel, Access, PowerPoint, PageMaker, InDesign, AutoCAD, PDF and HTML file types when files or folders are moved or renamed. Using patented technology, *LinkFixerPlus* helps eliminate the time-consuming and tedious process of manually finding and fixing broken links.

This newest release adds to *LinkFixerPlus'* current ability to move and rename InDesign v1.5, v2.0, CS and CS2 files, as well as Excel, Access, Word, PowerPoint, HTML, AutoCAD, PageMaker, PDF and Windows shortcut files, without causing broken links.

First introduced at the Internet World convention in New York City, *LinkFixerPlus* won the Best of Show award in the design category. Since that time, *LinkFixerPlus* has been favorably reviewed by industry experts in: *Cadalyst Magazine*, *eWeek*, *Redmond Magazine*, *Windows IT Pro*, CNET radio, CNNfn, *PC Magazine*, *Entrepreneur Magazine*, *The Washington Post*, *The New York Times*, *Computer World* and *The Wall Street Journal*.
