

Automatically fix broken links in Excel 2007 files during data migrations.

CLEARWATER, FLORIDA, USA — LinkTek Corporation, the pioneer in software solutions that automate the management and repair of links contained within a wide variety of common file formats, announced today the release of a new version of their *LinkFixerPlus* link maintenance and repair software, created specifically for users of Microsoft Excel.

This new version of *LinkFixerPlus for Microsoft Excel* ensures that links contained within Microsoft Excel 2007 files that point to external files, such as documents, spreadsheets, graphics, charts and other linked files), are automatically fixed when Excel files are moved or renamed — for example, when an enterprise-wide folder restructuring occurs or during a large data migration when files are moved to new servers or storage devices. The technology has proven to be particularly valuable when moving to global namespace products such as EMC's Rainfinity, F5 Acopia's ARX, Brocade's StorageX or File Management Engine and Attune Systems' Maestro.

LinkFixerPlus is the first software application that can fix broken links totally automatically in Word, Excel, Access, PowerPoint, PageMaker, InDesign, AutoCAD, PDF and HTML files when files or folders are moved or renamed. Using patented technology, *LinkFixerPlus* helps eliminate the time-consuming and tedious process of manually finding and fixing broken links.

This newest release adds to *LinkFixerPlus'* current ability to move and rename Excel 97, 2000, XP and 2003 files, as well as Access, Word, PowerPoint, HTML, AutoCAD, InDesign, PageMaker, PDF and Windows shortcut files, without causing broken links.

First introduced at the Internet World convention in New York City, *LinkFixerPlus* won the Best of Show award in the design category. Since that time, *LinkFixerPlus* has been favorably reviewed by industry experts in: *Cadalyst Magazine*, *eWeek*, *Redmond Magazine*, *Windows IT Pro*, CNET radio, CNNfn, *PC Magazine*, *Entrepreneur Magazine*, *The Washington Post*, *The New York Times*, *Computer World* and *The Wall Street Journal*.
