

Newest version of *LinkFixerPlus* for *AutoCAD* supports AutoCAD 2006 files.

CLEARWATER, FLORIDA, USA — LinkTek Corporation, a leading provider of software solutions that automate the management and repair of links contained within a wide variety of common file formats, announced today the release of a new version of their *LinkFixerPlus* link maintenance and repair program, created specifically for users of Autodesk's popular AutoCAD 2006 design software.

This new version of *LinkFixerPlus for AutoCAD* ensures that links contained within AutoCAD 2006 files that point to external files, (such as xrefs, images, fonts, sheet sets and other linked files), are *automatically* fixed when AutoCAD files are renamed or moved — for example, when files are renamed due to a project name change, or when files are moved to a new folder, disk drive or server.

“We are utilizing *LinkFixerPlus* to enhance our online archiving. It allows us to quickly repair previously moved projects and gives us the flexibility to much more easily move archival material. This especially pays off when we migrate the projects that are on hold to our archive server and have to make them active again at a later time,” says Steven Edwards, Vice President of IT for Solomon Cordwell Buenz & Associates, an award winning, architecture, interior design and planning firm in Chicago.

This newest release adds to *LinkFixerPlus*' current ability to rename and move AutoCAD R13 through R2005 files, as well as Excel, Access, Word, PowerPoint, HTML, InDesign, PageMaker, Acrobat and Windows shortcut files, without causing broken links.

First introduced at the 2002 *Internet World* convention in New York City, *LinkFixerPlus* won the *Best of Show* award in the design category. Since that time, *LinkFixerPlus* has been favorably mentioned on: Computer America talk radio, CNET radio, CNNfn, PC Magazine, Entrepreneur Magazine, the Washington Post, the New York Times, Computer World and the Wall Street Journal.

How To Contact LinkTek
